Let's try

- Jika ingin melakukan perubahan, buat branch terlebih dahulu. Branch inilah yang akan diusulkan untuk diterima oleh repo sumber
- Caranya?

Let's try

- Buat branch di github kita atau di local

The screenshot shows a GitHub repository interface. At the top, the repository name 'BrendaWinarko / simple-landing-page' is displayed in blue, with a 'Public' badge to its right. Below this, it says 'forked from sandhikagalih/simple-landing-page'. A navigation bar contains links for 'Code', 'Pull requests', 'Actions', 'Projects', and 'Wiki'. The 'Code' link is underlined. Below the navigation bar, there's a section for branches and tags. It shows 'master' as the current branch, with a dropdown arrow, and indicates '2 branches' and '0 tags'. A modal window titled 'Switch branches/tags' is open, featuring a search input field with the placeholder text 'Find or create a branch...'. Below the input field are two tabs: 'Branches' (selected) and 'Tags'. Under the 'Branches' tab, a list shows 'master' with a checkmark and a 'default' badge, and 'feature'. At the bottom of the modal is a link that says 'View all branches'.

A screenshot of a Windows terminal window titled "MINGW64://Mac/Home/Desktop/simple-landing-page". The terminal shows a user named "sandhikagalih" at a host "SANDHIKAGAL4654" in a "MINGW64" environment. The current directory is "//Mac/Home/Desktop/simple-landing-page" and the branch is "(master)". The user enters the command "\$ git push origin --delete features". The output shows the push to the remote repository "https://github.com/webprogrammingunpas/simple-landing-page.git" and a message indicating that the "features" branch has been deleted. The prompt "\$" appears again on the next line.
